Weekly Task - HTML5 Forms and validation

The purpose of this task is to increase your understanding of HTML5 forms and validation. Today we'll be focusing on HTML only, there will be no need to style the forms using CSS.

1 Setup

Create the file `form_task.html` and place it in your `internet_tech/session_7` folder. [Copy the starting HTML source code from here](#).

2 Populate the form with the correct inputs

Using the comments as guidance complete the form. It should resemble the below:

Student Survey

Name*: [_____]

Email*: [_____]

Number*: [_____]

What year are you in*: Select ▢

Which electronic devices do you use?
☐ Computer
☐ Ebook reader
☐ Smart phone

How many hours a day do you spend using electronic devices?
○ 1 hours
○ 2 Hours
○ 3 Hours +

Any other comments

[text area]

[Submit]

3 No need to validate your HTML this week

As we're not focusing on CSS this week, we've had to use a few tags that will break validation. Therefore, you're not required to validate your work.

4 Update your learning log
